

Rise Above Plastics Petition

Dear Elected Leader:

We need your help protecting Florida's coastal resources from rampant plastic litter. Single use plastics are putting our oceans, beaches, health and economy at risk. We believe that local governments should be able to restrict plastics in their community, including plastic bags, Styrofoam, and other disposable products. Please let the Florida Legislature know that you support local rights to limit plastics, and oppose the state preemption that keeps our community from limiting, banning or taxing plastic bags.
